#### Our Objective

To ensure our valued clients receive excellent returns while we protect and preserve client's funds.

#### Why Investors Choose PPP

Professional investors looking for better returns are starting to move away from standard asset classes like stocks, bonds and cash to Private Placement Programs (PPP).

Private Placement Programs traditionally have been the domain of institutional investors or high net worth individuals because of their complex nature. However, since 2008 and the introduction of Fully Managed 100% Capital Protected Private Placement Programs it is now easier than ever for traditional investors to participate in PPP programs.

## Trading portfolio includes

-  Hedge funds
-  Managed futures
-  Currency trading
-  Real estate
-  Commodities

These asset classes are favoured mainly because their returns have a low correlation with the assets value.

## Risk Protection

With a balance of Dynamic Trading Strategies, prudent Risk Management and Exceptional Liquidity our Private Placement Program (PPP) has consistently achieved outstanding historical results.

Our success is achieved because we operate a series of clearly defined Risk Protection Strategies including:

-  Disciplined investment rules
-  Strict asset control
-  An investment philosophy of meticulous risk management
-  All trading is constantly supervised by our risk executive
-  Effective regulation
-  Our experts execute our pre-defined and stringently managed strategy of diversification
-  We combine hedging strategies (buying and selling of contracts of the same value in opposite directions at the same time) to constant mitigate our risks
-  Based in one of the most well-regulated, reputable and secure financial centers in the world

Most PPP Programs scream sky high interest returns and are silent about Risk. The truth is very few Private Placement Programs like the EC Program are 100% Capital Protected. At EC we value clients deposit funds safety *before* high interest returns!

The world is a volatile and turbulent place with unexpected economic changes happening unannounced. The truth is unanticipated market turmoil can hit at any time, we therefore strongly caution clients to place the elimination of risk well ahead of the banking of profits.

Some PPP programs operate with considerable risk by over promising 100% or 200% returns per month while at the same time exposing investors to total loss of all funds.

Getting rich and then getting wiped out is not a solid wise investment strategy and that's why BOTH of the EC Private Placement Programs (PPP) offer realistic returns and 100% Capital Protection. We never want our clients to ever lose their initial invested deposit or capital.

Let us grow your asset safely together in the EC Private Placement Program (PPP), instead of going to the casino and betting it all on red or investing it in some other dodgy PPP program that promises a million percent return and exposes everything you have worked so hard for to oblivion.
